

FIRE POLICY CARDS

Boreal Forest

Prescribed burning should be done to increase browse for moose where the moose population is declining.	All Forest fires should be put out.
Loggers and firewood cutters should be allowed to cut dead trees out of a burned area.	Trees that have been killed by spruce bark beetles should be removed from the forest.
We should let all forest fires burn.	Prescribed burning should be done to remove the trees that have been killed by spruce bark beetles.
